Superseding  
PIA-W-43668A  
3 January 2006

The following commercial specification is adopted from the military document. Initial and Revision A included in all known accepted revisions, amendments, notices, and Department of Defense (DoD) engineering changes previously developed for this item. Revision B and forward include changes adopted by DoD and Industry to reflect technology and design evolution.

---

## WEBBING, TEXTILE, TEXTURED OR MULTIFILAMENT NYLON

The Parachute Industry Association makes this document available for use by Industry and Government organizations that wish to apply this specification to their products.

### 1. SCOPE

1.1 Scope. This document covers textured or multifilament nylon webbing used for individual equipment belts and load carrying equipment.

1.2 Classification. The webbing shall be of the Types indicated in TABLE I as specified (see 6.2). All Types may be manufactured by either shuttle or shuttleless looms except Types I Alternate, III Alternate, III Hybrid, VI and VII which shall be manufactured on shuttleless looms only. Type I Alternate, Type III Alternate and Type III Hybrid constructions (see TABLE I) are acceptable substitutes for Types I and III respectively.

Type I	- 2¼ inches
Type II	- 1¼ inches
Type III	- 1 inch
Type IV	- ¾ inch
Type V	- 5/8 inch
Type VI	- 1½ inches
Type VII	- 2 inches

### 2. APPLICABLE DOCUMENTS

2.1 General. The documents listed in this section are specified in Sections 3 and 4 of this specification. This section does not include documents cited in other sections of this specification or recommended for additional information or as examples. While every effort has been made to ensure the completeness of this list, document users are cautioned that they must meet all specified requirements documents cited in Section 3 and 4 of this specification, whether or not they are listed.

#### 2.2 Government documents.
