PIA-T-5661
24 January 1998

Renamed from
MIL-T-5661E
17 March 1988

The following commercial specification is adopted from the military document referenced *without change* to the content.

Note: Although many military quality and inspection specifications, drawings and standards have been discontinued or deleted, most have been replaced by industry and commercial documents. When the specification refers to a discontinued or deleted document, you should refer to the procurement document or your contracting officer for guidance.

TAPE AND WEBBING, TEXTILE, WOVEN REINFORCING, COTTON

The Parachute Industry Association makes this document available for use by Industry and Government organizations that wish to apply this specification to their products.

1. SCOPE

1.1 Scope. This specification covers five types of woven cotton reinforcing textile tape and webbing intended for use in the manufacture of aeronautical equipment.

1.2 Classification. The tape and webbing shall be of the following types, as specified (see 6.2).

- Type I — Plain weave
- Type II — Double herringbone weave
- Type III — Twill weave
- Type V — Plain (transverse cord) weave
- Type VI — Nonelastic weave

2. APPLICABLE DOCUMENTS.

2.1 Government documents.

2.1.1 Specifications and standards. The following specifications and standards form a part of this specification to the extent specified herein. Unless otherwise specified, the issues of these documents shall be those listed in the issue of the Department of Defense Index of Specifications and Standards (DODISS) and supplement thereto, cited in the solicitation.
