# ***BRAC Decision***

**In 2005, the BRAC Commission recommended that the management of Aerial Delivery secondary items be transferred to DLA Defense Supply Center Philadelphia.**

# *Update as of SEP 08*

 In July 08, a decision was made to retain all class II items that have a Line Item Number (LIN) associated with them.

 For Aerial Delivery items, this means approximately 70 class II items will be retained for management at Natick.

 For the items transferring to DLA, an early transfer (2010) is being discussed.

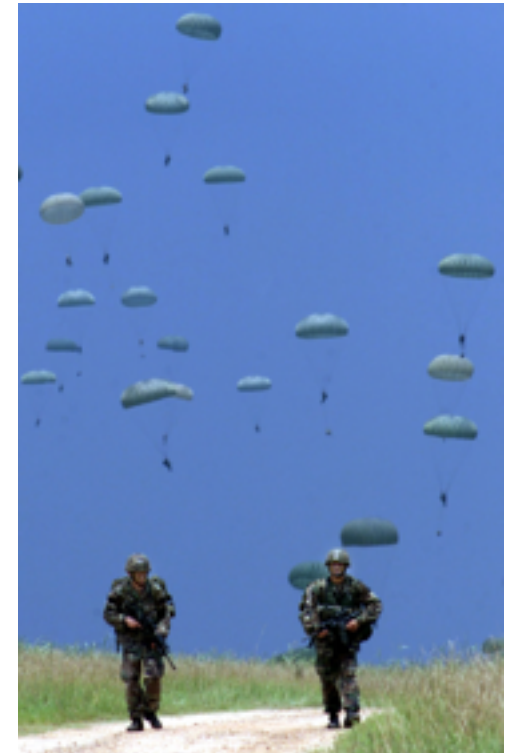

# LIN Information

- A Line Item Number (LIN) The LIN is a 6-character alphanumeric identification (ex. N68062). It is used on equipment authorization documents (such as Modified Table of Organization and Equipment-MTOE, or a Common Table of Allowance-CTA).
- LINs are assigned during the provisioning process.
- An item with a LIN also receives an Item Management Code (IMC) of “D” meaning: an item that is a class VII (Major Item) or Class II (Secondary Item) with a LIN.
- Aerial Delivery has 70 class II items with a LIN and are classified with a IMC of “D.”
