

The following commercial specification is adopted from the military document referenced *without change* to the content.

Note: Although many military quality and inspection specifications, drawings and standards have been discontinued or deleted, most have been replaced by industry and commercial documents. When the specification refers to a discontinued or deleted document, you should refer to the procurement document or your contracting officer for guidance.

The Parachute Industry Association makes this document available for use by Industry and Government organizations that wish to apply this specification to their products. This document is published by the PIA to provide technical and engineering standards that can be used by reference by all those who may benefit from them. The use of this document is entirely voluntary, and its applicability and suitability for any particular use, including any patent or trademark infringement arising therefrom, is the sole responsibility of the user. The original government document was scanned. There may be errors especially in numbers. PIA disclaims any responsibility for accuracy. The PIA reviews each technical publication periodically, at which time it may be reaffirmed, revised, or canceled. The PIA invites your written comments and suggestions.

Notice: This document has been adopted with only typographical corrections from the original Mil-Spec, and is being maintained as a commercial specification by the Parachute Industry Association. Orders, inquiries and comments should be addressed to PIA, Specification Department, 3833 West Oakton Street, Skokie, IL, 60076, USA, or via e-mail: hq@pia.com, specs@pia.com or to our web site: <http://www.pia.com>.
