

Upcoming Procurement Instrument Identifier (PIID) Change and Effects on DIBBS (1 Oct 17)

In order to standardize procurement transactions across the Federal Government, the FAR has been amended to implement a uniform award identification system, as recommended by the Government Accountability and Transparency (GAT) Board. This uniform numbering system will be referred to as the Procurement Instrument Identification (PIID). The new PIID structure will require the use of Activity Address Codes (AACs) as the unique identifier for contracting offices, the current fiscal year, instrument type and a four character serial number. Delivery Orders will no longer share elements with their basic contract.

No changes to the current solicitation, solicitation amendment, manual Purchase Order (PO) and automated PO numbering

- Manual PO: "P" in the 9th position
- Auto PO: "V" in the 9th position

Long Term Contract (LTC)

- No change to the current 13-character format
- "D" in the 9th position

Delivery Orders (DO)

- "F" in the 9th position
