Parachute Requirements
Demand and Supply Profiles

Background

• The following charts depicts the ‘snap-shot’ as of today of what we anticipate our future requirements to be…(non-binding projections)

• Items were transferred to DLA from the Army, in poor support status, causing Army users to inflate demand

• Big unknown is how and when Army will alter their demand signal to DLA to deplete their internal stock levels
  - Declining Army demand will impact DLA orders (quantity and timing) to industry
